INTERNATIONAL JOURNAL OF MASS SPECTROMETRY AND ION PROCESSES, VOLUME 83 (1988)

SUBJECT INDEX

acetone
a pulsed ionization high-pressure mass spectrometric study of methyl cation transfer and methyl cation-induced clustering in dimethyl ether–— mixtures 147
acetylnaphthalene
internal reactions of ion/molecule complexes from isomeric protonated formyl- and — 111
antimony
the isotopic composition of — 311
Ar_n clusters
photodissociation of large neutral — (n up to 150) with visible laser light R1
atmospheric pressure electron capture mass spectrometry
use of ion clustering equilibria in analysis by — 189

balanced drift voltage control
an improved — for ion cyclotron resonance drift cells 215

$[CCl_4]^{+\cdot}$
the stability of —, $[Cl_2C–Cl–Cl]^{+\cdot}$, their dications, and neutral counterparts 285
$Cl^{2+}(^4S, ^2D, ^2P)$
single-electron capture by — from rare-gas targets 331
$[Cl_2C–Cl–Cl]^{+\cdot}$
the stability of $[CCl_4]^{+\cdot}$, —, their dications, and neutral counterparts 285
charged cluster stability
model for — based on polyhedral arrangement of point charges 231

D_2
effect of kinetic and electronic energy on the reactions of Ti^+ with H_2, HD, and — 259
D_2O
H_2O and — total ionization cross-sections by electron impact R7
dimethyl ether
a pulsed ionization high-pressure mass spectrometric study of methyl cation transfer and methyl cation-induced clustering in ——acetone mixtures 147
dimethyl sulfoxide
unimolecular dissociation of energy-selected — 1
double charge-transfer mass spectrometry
a reaction window in — 203

electron impact
H_2O and D_2O total ionization cross-sections by — R7

Formylnaphthalene
internal reactions in ion/molecule complexes from isomeric protonated — and acetylnaphthalenes 111

H_2
effect of kinetic and electronic energy on the reactions of Ti^+ with —, HD, and D_2 259
HD
effect of kinetic and electronic energy on the reactions of Ti^+ with H_2, —, and D_2 259
H_2O
— and D_2O total ionization cross-sections by electron impact R7

ion clustering equilibria
use of — in analysis by atmospheric pressure electron capture mass spectrometry 189
ion cyclotron resonance drift cells
an improved balanced drift voltage control for — 215
ionic clusters
photodissociation dynamics of small —. The $O_2^+ \cdot (CO_2)_2$ trimer 71
ions
kinetic energy distribution of — generated by laser ionization sources 45
ion sources
the plasma chemistry of — 209
iron isotope ratio measurements
— with the thermal ionization technique using a compact quadrupole mass spectrometer 319

large isomers
differentiating between — and derivation of structural information by ion mobility spectrometry/mass spectrometry techniques 163

laser ionization sources
kinetic energy distribution of ions generated by — 45
^6Li
an enriched — isotopic reference material 135

Mathieu parameter
quadrupole mass filters with varying — 295
metal clusters
a comprehensive methodology for the study of sequential ion/molecule reactions using Fourier transform ion cyclotron resonance. The formation, isolation, and reactions of very large — 23

naphthalenium ions
proton migration in — via σ and π complexes 93

$O_2^+ \cdot (CO_2)_2$ trimer
photodissociation dynamics of small ionic clusters. The — 71
O_2 molecular beam
oxygen cluster ions formed by electron impact of an — 13
oxygen cluster ions
— formed by electron impact of an O_2 molecular beam 13

point charges
model for charged cluster stability based on polyhedral arrangement of — 231
polycyclic aromatic hydrocarbons
a study of multiply charged ions derived from — 245
post-sector beam deflection
— in time-resolved ion momentum spectrometry (TRIMS) 177
proton migration
— in napthalenium ions via σ and π complexes 93

quadrupole mass filters
— with varying Mathieu parameter 295

secondary organic ions
sputtering theory and — 223
sequential ion/molecule reactions
a comprehensive methodology for the study of — using Fourier transform ion cyclotron resonance. The formation, isolation, and reactions of very large metal clusters 23
sputtering theory
— and secondary organic ions 223
structural information
differentiating between large isomers and derivation of — by ion mobility spectrometry/mass spectrometry techniques 163

Ti^+
effect of kinetic and electronic energy on the reactions of — with H_2, HD, and D_2 259
time-resolved ion momentum spectrometry
post-sector beam deflection in — (TRIMS) 177

visible laser light
photodissociation of large neutral Ar_n clusters (n up to 150) with — R1
